

EOW Quant Engine ? Full System Report

Generated: 2026-05-28 15:22 UTC Mode: TIER 2: LIVE PAPER ? VIRTUAL CAPITAL Phase: FTD-025A

1. Executive Summary

Total Trades	1831
Net PnL (USDT)	-254.5513
Win Rate	22.6%
Profit Factor	0.476
Sharpe	-3.567
Max Drawdown	25.50%

2. Performance

Final Capital	745.45
Sortino	-4.692
Calmar	-0.137
Risk of Ruin	100.00%
Deployability	45/100 (NOT READY)
Fees Paid	132.6213
Slippage	71.8621

3. Signal Pipeline

Signals / hour	405.00
Trades / hour	7.00
Rejection Rate	0.0%
Mins since trade	5.2

4. Decision Trace (last 30 thoughts)

14. Final Diagnosis

? **PRIMARY ISSUE:** SYSTEM IN LOSS ? profit_factor=0.476 (negative expectancy)

? Detail ? 1831 trades; win_rate=22.6%. Every trade destroys capital on average. Immediate action required.

? Fix ? Widen RR target to ?1.5R; tighten entry criteria; reduce trade frequency until PF recovers above 1.0. Review Section 3 (Signal Pipeline) and Section 8 (Suggestions).

?

? **SECONDARY ISSUE:** RISK OF RUIN = 100.0% ? CAPITAL IN DANGER

? Detail ? System controls active: DD state=NORMAL, risk_multiplier=1.00 (NOT yet reduced), halted=False.

? Fix ? Halve base_risk immediately. drawdown_controller auto-reduces sizing when risk_multiplier < 1.0. Activate DEFENSIVE mode. Do not add new positions until RoR drops below 50%.

?

? **ACTIONABLE FIX (primary):** Widen RR target to ?1.5R; tighten entry criteria; reduce trade frequency until PF recovers above 1.0. Review Section 3 (Signal Pipeline) and Section 8 (Suggestions).

?

? **Also noted (requires attention):**

? - 50 ERRORS recorded in audit log: High error count may indicate WS connectivity or data quality issues.

15. Action Checklist

[] Review Section 4 (Decision Trace) for last 30 thoughts.

[] Archive this report under /reports/<date>/ for audit trail.
